MERCHANT INSIGHTS

Seasonal & Gifts leads all categories with 83.5% margin — 15.4% above the portfolio average. However, it accounts for only 2.9% of total revenue. **Miscellaneous** is the highest-revenue category (₹21.1L) but drags margin at 67.9%. Renegotiating cost on top **Miscellaneous** SKUs could add ~₹1.3L in annual margin improvement.

Category Overview | Vendor Performance | Promo Intelligence | Channel & Freight | Weekly MIS

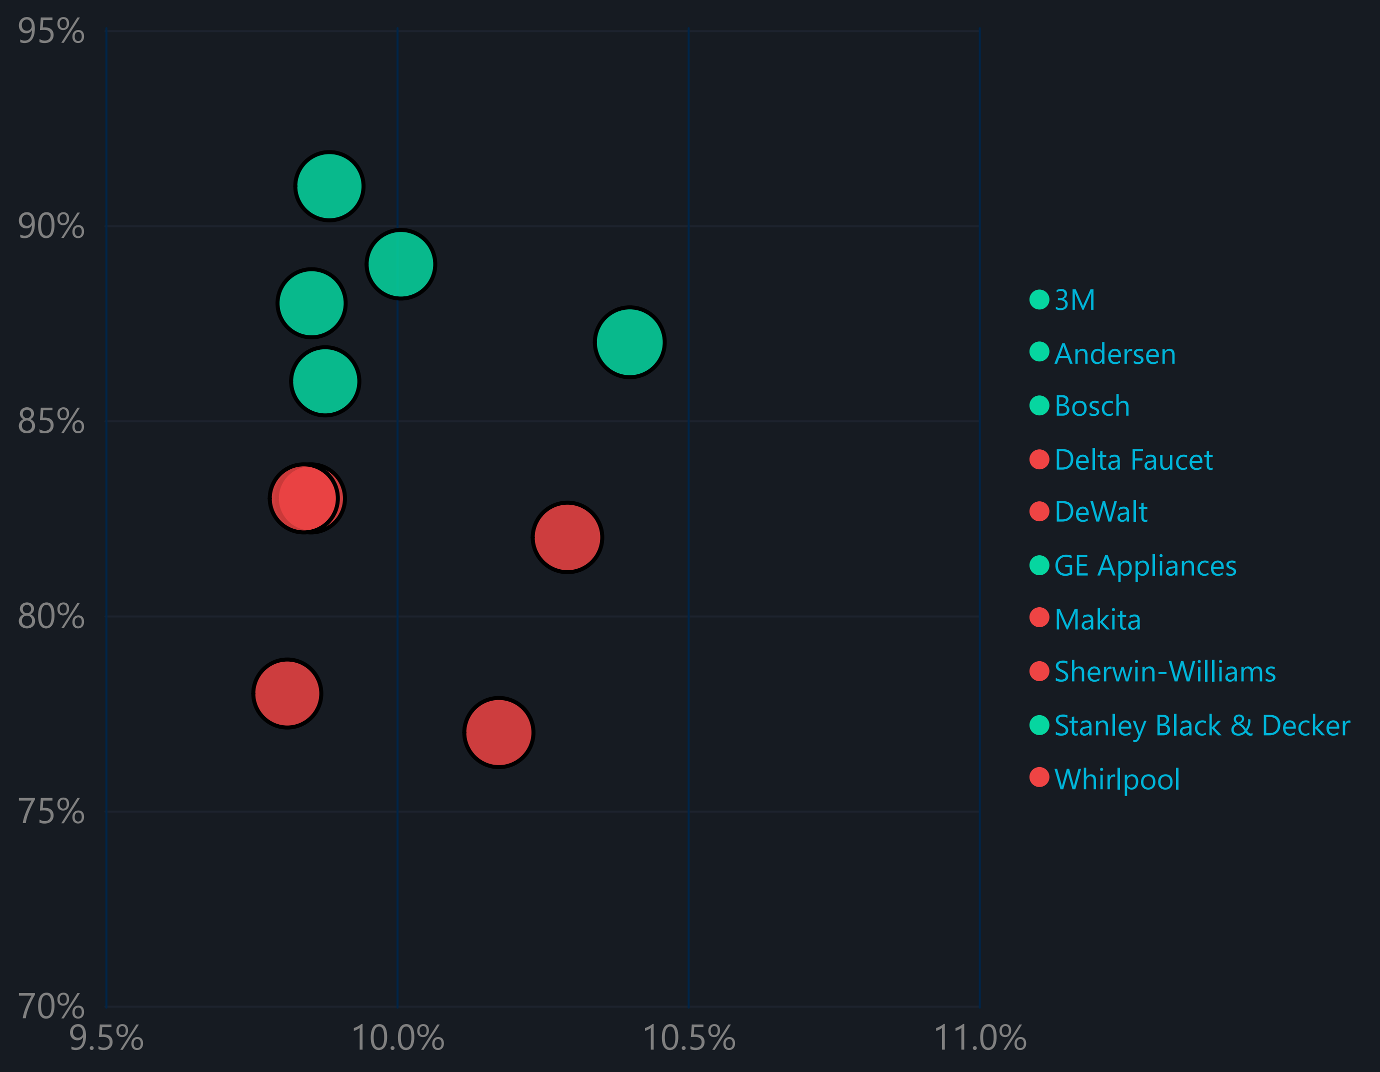
TOTAL VENDORS	HIGH RISK VENDORS	DEPENDENCY RISK	AVG PORTFOLIO FILL RATE
10	5	2	84.4%
Active this Period	Fill Rate < 85%	Delta Faucet + Makita	BELOW 85% THRESHOLD
	HIGH RISK	>10% Revenue + Low Fill	⚠ Marginal

CRITICAL VENDOR ALERT

Delta Faucet (Rank #1, 10.3% of revenue) and Makita (Rank #2, 10.2%) both carry DEPENDENCY RISK — high revenue contribution combined with fill rates below 85% (82% and 77% respectively). Any supply disruption from either would directly impact category availability during event periods. Recommend: Escalate to Merchant for vendor review meeting before next buying cycle.

Vendor Fill Rate vs. Revenue Contribution

Bubble size = revenue · Red zone = fill rate below 85% threshold



Revenue Contribution by Vendor

Near-equal distribution across all 10 vendors (~10% each)

PROMO DEPTH VS. VOLUME TRADEOFF

Kitchen & Dining showed a -26.4% lift during promo periods — meaning customers bought LESS when the category was promoted. This signals over-saturation or poor promo timing. Combined with its $12.5L revenue base, recovering this category's promo strategy could be worth ~$1.9L in recaptured promo revenue. Miscellaneous saw -52% lift — the deepest underperformer — suggesting product mix or price point mismatch during events.

30.1% of total

ONLINE MARGIN EDGE
6.84%
Online slightly outperforms 3P

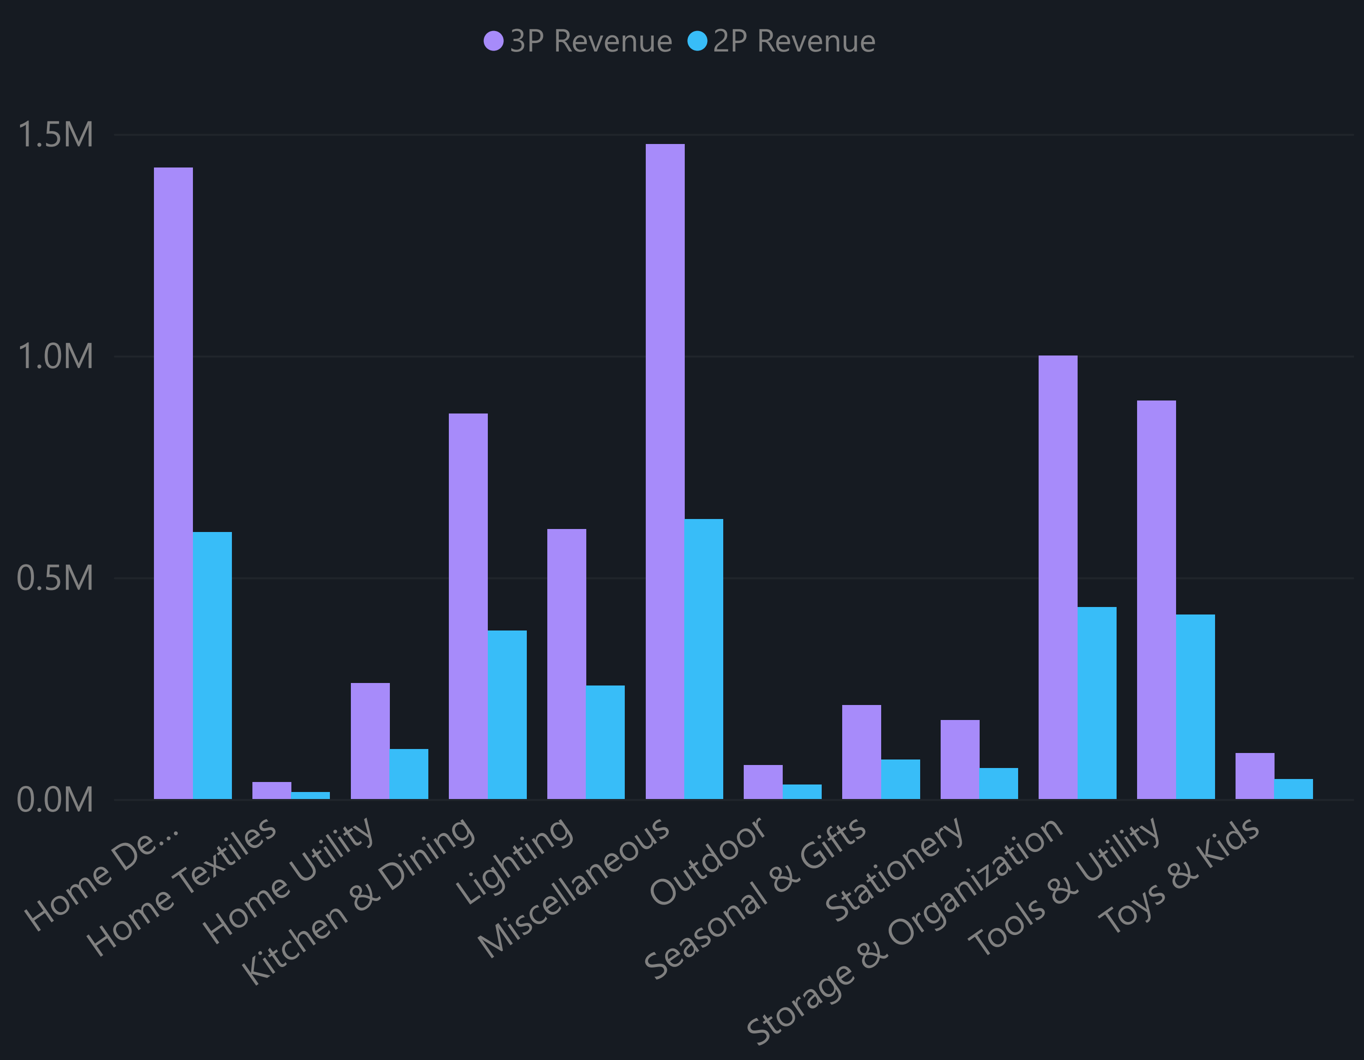
FREIGHT COST DIFF
~8% vs 12%
2P (Online) significantly cheaper
Prefer Online

CHANNEL STRATEGY FINDING

All 12 categories show lower freight cost-per-unit on **2P (Online)** vs **3P (In-Store)**. Online freight runs at 8% of revenue vs. 12% in-store — a consistent 4-point savings. **Seasonal & Gifts** is the highest-margin category in both channels (83.4% online, 83.5% in-store), indicating it performs well regardless of channel. Prioritise digital expansion for high-margin categories to capture cost advantage.

Revenue Split: Online vs. In-Store

By category — 2P (Online) vs 3P (In-Store)



Freight Cost per Unit — 2P vs 3P

Lower is better · Online consistently cheaper across all categories

MIS Seasonal Intelligence

Revenue follows a **clear bimodal seasonal curve** — Q1–Q3 are stable at $220K–$230K each, while **Q4 alone drives ~37% of FY revenue** in just 13 weeks. The dual-axis overlay reveals a consistent **margin compression of ~2.1pts during event weeks** (W39–49), likely from promotional discounting. **Week 52 crashes 89% from peak** — a sharp demand withdrawal. Non-event weeks 34–38 post the best sustainable margin at 76%+, making them ideal for regular-priced volume push.
